WORK EXPERIENCE

01 Founders, London - Fellowship *Dec 2021 – Present*

- Proficient in developing using Golang, JavaScript, and Rust, with a focus on efficiency and simplicity
- Experienced in using a range of technologies, including React and Docker, among others, to develop and deploy complex applications.
- Introducing agile working methods to improve efficiency by 25%.
- Collaborated with groups of 3-6 team members to successfully complete a range of projects, including a social media website, demonstrating strong communication and teamwork skills.
- Worked autonomously, setting and achieving self-set deadlines, and contributed to a peer-to-peer teacherless program, fostering a collaborative learning environment.

01 Founders, London - Coding Assistant *Feb 2023 – Present*

- Leading student group and team activities to improve collaboration and cohesion.
- Working autonomously to successfully meet multiple deadlines.
- Support students with different requirements to ensure technical and soft skill development.
- Planning workshops and activities to attract new students
